Profile

Computer Science undergraduate with strong foundations in Algorithms, Systems, and AI. Experienced in building intelligent applications, performance-optimized architectures, and data-driven systems.

Education

B.Tech in Computer Science and Engineering CGPA: 7.51/10
Amrita Vishwa Vidyapeetham, Coimbatore
Senior Secondary – Sri Chaitanya Junior College
Secondary Education – Delhi Public School (DPS)

Projects

Marv Strike: AI Strategy Engine Python — Algorithms
- Developed turn-based AI engine using Divide & Conquer and Greedy strategies.
- Designed modular decision logic for optimized move evaluation.

Dynamic Knowledge Graph Java — Graphs
- Built self-updating graph system supporting complex dynamic queries.
- Implemented optimized DFS/BFS traversal mechanisms.

Parkinson's Assistance System Embedded Systems
- Integrated EMG sensors with servo motors for neuromuscular assistance.
- Developed real-time signal processing and control logic.

CA Architecture Optimizer Systems — PostgreSQL
- Designed performance evaluation model for architectural simulations.
- Analyzed latency and throughput metrics using structured datasets.

Technical Skills

Languages: C, Java, Python, MATLAB, JavaScript

Web & Tools: HTML5, CSS3, JSON, Git, GitHub, Electron, LaTeX

Core CS: DSA, OOPS, Operating Systems, Computer Architecture

Databases: MySQL, PostgreSQL

Systems: CPU Architecture, Embedded Systems, Open Source Systems

Leadership

Innovation Ambassador (2026) — IIC Member — NSS Volunteer

Interests

Artificial Intelligence, Agentic Systems, Cybersecurity, Cloud Computing

Hobbies

Reading Books
